

Keep your kuri safe

1080 has been applied in Raukūmara Block One

- It is not safe to take dogs here
- Keep your dog on a lead anywhere carcasses could wash up
- Use a muzzle to stop your kuri scavenging

If your dog ingests 1080 pellets or a carcass:

- Act fast - dogs can die within two hours.
- Symptoms are disorientation, restlessness, hyperactivity, aggression, running in circles, barking or howling for no reason, and sensitivity to touch.
- Get your kuri to a vet ASAP
- Make your dog vomit
 - Put one or two crystals of laundry, dish washing powder or drops of liquid sodium carbonate down the dog's throat.
 - You can also use dog emetic pills or a teaspoon of table salt.
